Adventurous ♦ Focused ♦ Collaborative

## Executive Expertise...

## Optimizing Data for Success

## DYNAMIC RESULTS

**Integrated** fragmented, mistrusted operational and customer data into unified, enterprise-wide analytics platforms powered by GenAI and other advanced technologies.

**Led** Optum/Change Healthcare's transition beyond traditional BI, driving measurable improvements in operational efficiency, executive decision-making, and customer experience.

**Spearheaded** data strategy efforts through two FDA-contested mergers, aligning data integration, governance, and compliance frameworks to support successful outcomes under intense regulatory pressure.

**Directed** engineering and analytics teams of 160+ at Teradata and 250+ at Change Healthcare, while balancing product, research, and business objectives through structured leadership practices.
